Sharing - Other

You have several different options of sharing your recording. You can either Save it to Library, access recordings on iTunes on Your computer, or Upload it to our server, and than share a link to it with your audience.

Creating Recording

To create a recording to follow steps described below:

Main Screen:

1. Tap on the Create a New Recording
2. (Optional) Add title
3. Tap on the Start Recording button

Recorder Screen

The black space above the thin gray bar with a "Double tap on the screenshot..." message is a canvas that can be used to draw with your fingers and adding some additional elements (changing background image and etc.).

Recording

To start recording you need to tap on the red Record button in a bottom-left corner. From now on app will record everything what you draw on the canvas (inside the app) and your voice.

To finish recording you need to tap on the Finish button. (bottom-left) corner again.

Accessing recording/s

Your completed recordings are shown in the list on the left hand side off the main screen.

To play it select one of the recording in the list on the left and tap on the play (gray triangle) button on the right.

Lecture Capture App General Information

Create

Lecture Capture app allows you to create recording of your screen in few simple steps. From the main screen tap on the Create New Recording. Then pick the title of your new recording, and tap on the Start Recording button. Lecture Capture app will record your activity including drawing using your fingers on the screen and audio. You can also add images or make a new to server as a background for the recording. To finish recording tap on the Done button. The newly finished recording will appear in the list on the left side of the main window.

Watch

You can watch and review your recordings in the Lecture Capture App. From the main window tap on the any item from the list. Tap on the play button that will appear in a right part of the screen. The list will show your information about title like size or title. It will also show the URL if the recording was previously uploaded to the server.

Share

Lecture Capture app provides several different ways of sharing your recordings. The files under 100 MB can be uploaded to application's server.

In order to do it:

- 1 Register and login to your account.
2. Select the video from the list on the left
3. Tap on the Upload Recording button.
4. Wait. The operation might take up to several minutes, depending on the size of the file and your network connection.
5. Share your recording by passing URL of the recording.

Lecture Capture App allows you also to save your recordings to Media Library. Once you do it you can access your video from the Apple's Camera app.
